DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

Paragraph 34, line 3:

DELETED: "rotor shaft 2"

INSERTED: --rotor shaft 22--

Allowable Subject Matter

2. Claims 1-8 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claim 1 and its dependent claims are found to be allowable because the prior art of record neither teaches nor reasonably suggests the recitations found therein, including inlet and outlet slot-like shapes opposed to one another by 90 degrees with a cylindrical space therebetween. Such a channel shape is considered new and inventive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wassenhoven et al (5953897), Stahlecker (6295800), Lovas et al (5901546), Raasch (5685137), Schuller et al (5555717), and Okamoto (5295349) all teach what is known in the art.
